

# Omlet

## Welcome to Omlet's Wonderful World!

Using the experience of thousands of delighted customers and leading animal experts, Omlet has developed the eglu and our personal service to offer you a truly innovative and enjoyable way of keeping rabbits.

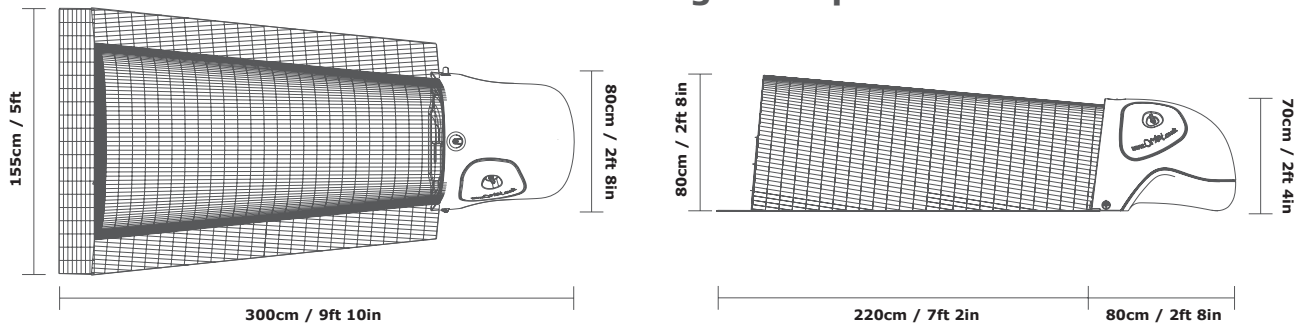

Modern, easy to clean and safe, the eglu is a completely different kind of rabbit house. Inside you'll find smooth plastic surfaces which can be simply wiped clean as well as other thoughtful details which make maintaining the eglu quick and easy. All year round, your rabbits will love their new environment, from the integral hay and water rack to the space and security of the large run.

On our website you can find further detailed advice on looking after your rabbits and we're always delighted to help on the phone. We hope you enjoy the brochure,

**James, Johannes, Simon and William.**

### Overall dimensions of an eglu complete with run

## The perfect habitat for your rabbit

Omlet has created the perfect habitat for your rabbits by working closely with leading animal behaviourists Dr Anne McBride and Emma Magnus Msc. and using studies of rabbits living in the wild.

The eglu and run together offer a living environment that's near to nature. In the eglu your rabbits can exercise, relax and feed according to their own routines, just as they would in the wild. They typically spend the day resting and feeding, becoming playful in the evening. By following their natural biological rhythm your rabbits will be more content. A happy rabbit is easier to handle or feed by hand which is an excellent way of gaining their confidence and building a relationship.

### Comfortable all year round

The eglu's special twin walled structure insulates the house against temperature variations to keep your rabbits comfortable, no matter what the weather is like outside. Even on the hottest days it will be cooler inside the eglu while you can be sure that your rabbits will be snug and warm in winter. Fresh air circulates in the eglu when the door is closed through specially positioned holes which ensure draft free ventilation.

### Rabbits enjoy each others company

Rabbits are sociable animals and a well matched pair will really enjoy each others company. The eglu is perfect for two medium sized rabbits, including breeds such as the English or the Rex. The best combination is a male and a female. If you are thinking of introducing a companion for your rabbit you can find useful advice on how to do this on our website, [www.omlet.co.uk](http://www.omlet.co.uk)

## Service and support from Omlet

You'll find that the service and support that Omlet provides has been designed with the same care and attention to detail as the eglu. The eglu comes with a booklet, which describes all you need to know about keeping your rabbits happy and healthy. When you buy from Omlet you can have complete confidence that you are buying a home that has been perfectly tailored to the needs of you and your pet.

### 'Just a quick email to say how happy we are with our eglu'

It is easy to use, move, keep clean and most importantly we have a very happy rabbit. He has stayed snug and happy even in this very cold weather. We cannot fault the design or after sales service, (how nice to be telephoned and asked if we are happy with the product).

**Rebekah Ley, Cambridge**

### 'Our two rabbits are much more lively in their new eglu'

It is lovely to watch our rabbits snuffling around in the grass to find the nicest tasting dandelion. My two young daughters actually get in the run to play with them. And it's remarkably easy to empty the litter tray, wipe the surfaces and know that their house really is spotlessly clean.

**Penny Gowland, Nottingham**

## Designed around your rabbit

Inside the eglu your pet rabbits have a place to eat, drink and relax. The innovative hay rack and water bottle are located in the house and can be easily reached through the side door. Having the water inside the house has two advantages. Firstly, it is protected from direct sunlight which reduces the formation of algae. Secondly, in the winter the water is insulated by the house making it less likely to freeze.

Rabbits are herbivores and in the wild they will spend a lot of their time eating vegetation. The hay rack is the ideal way to provide the hay which should form the main part of your rabbits diet. Just below there is a handy stainless steel dish for feeding pellets and other hard foods. Generally rabbits love crunchy vegetables like carrots and turnips and these will also help to keep your rabbits teeth in good condition. The dish, hay rack and water bottle come as standard with the eglu for rabbits.

The integrated hay rack, water bottle and feed bowl can all be easily removed for refilling

Opening the front door to the spacious run

Removing the lid allows full access inside the eglu

Cleaning is simple using the lift-out tray

## The eglu is easy to clean

Keeping your rabbit's home comfortable and clean is essential but it doesn't need to be a chore. Thanks to its logical design the eglu can be thoroughly cleaned in a matter of minutes.

With your rabbits in the run, you can close the eglu's front door and open the lid. Removing the eglu's lid makes the whole of the inside instantly accessible. The handy tray can be lifted out and the used bedding emptied straight into a composter or bin. The tray and the eglu's interior are made from smooth non-absorbent surfaces which can be quickly wiped clean, if required you can use a pet safe disinfectant. After re-filling the bedding tray with fresh wood shavings and topping up the food and water containers you simply pop the lid back on and open the door for your grateful rabbits!

Even after years of use the eglu's elegant maintenance free design will still look like new.

## The eglu comes with a large secure run

The eglu's run is a huge space for your rabbits to play in and with a height of 80cm (31inches) it has plenty of room for them to stand upright. All this space will make sure that they get the exercise they need to develop strong bones, stay fit and healthy. You can use the door in the end of the run to stroke your rabbits and feed them. If you have rabbits which like to dig, you can fit the optional wire mesh to the floor of the run, there is more information about this at the end of the brochure.

**No foxes allowed™** is the eglu's proven defence system. The run is made of coated 3 mm steel weld mesh – impossible for vermin to break through. A unique 200mm skirt sits flat on the ground and effectively prevents animals from digging under the run. The eglu's front and side doors are secured with recessed handles leaving nothing for unfriendly paws and jaws to grip on. Thousands of pets rely on the eglu's **No foxes allowed™** defence system to keep them safe.

The eglu's unique anti-tunnel skirt stops foxes digging and protects your rabbits

The optional underfloor panel stops particularly keen diggers from getting out

## An eglu for Guinea Pigs

Guinea pigs will love the eglu too! The inside of the eglu for guinea pigs is the same as the eglu for rabbits, just as easy to clean and just as comfortable. It comes in a special version with a shorter run (half the length of the normal size), but still plenty of space for your pets to exercise and play in.

If you haven't kept guinea pigs before, they are very friendly creatures, with a lot to say for themselves. They will make loud, welcoming squeeks to greet you, sometimes they put so much energy into this squeaking that their ears will move up and down at the same time! Guinea pigs make excellent pets for children too as they love to be picked up and cuddled and they don't bite. Feeding is straightforward and they don't need any routine veterinary care. There is more information about guinea pigs and the eglu on our website.

Inquisitive guinea pigs have space to explore

## The Omlet Website

A selection of pages from the Omlet website

Need to know more about the eglu or keeping rabbits? Then look no further than the Omlet website [www.omlet.co.uk](http://www.omlet.co.uk). You'll find sections on all our products and short video clips of the eglu in use. A breeds directory on the website features the most popular and extraordinary varieties from all over the world. You will also find comprehensive guides covering everything from daily rabbit routines to seasonal care.

The well stocked online shop has carefully chosen accessories to compliment your eglu and some little luxuries with which to treat yourself and your rabbits. Ordering is simple and secure and your items will always be sent out to you promptly by our efficient team.

## The Omlet Club

As an eglu owner you will have access to the Omlet Club on the Omlet website. The club includes several areas including a forum, a gallery and a library of Omlet Newsletters. It's a hugely enjoyable and lively community where people with lots of experience of keeping rabbits in eglus share tips and advice with each other.

The gallery pages are filled with pictures of eglus and rabbits, and you can put names to faces in the "meet the eglu owners" pages. With well over a thousand members there's never a dull moment in the Omlet Club!

You can order by calling **0845 4502056** or online at **www.omlet.co.uk**

## Other things you might like from Omlet

### The eglu for chickens

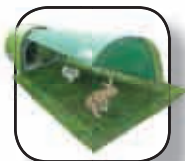

The eglu is a truly innovative chicken house designed specifically for the garden. Inside, the eglu has wooden roosting bars and a nesting box for egg laying. Quick and easy to clean, the eglu's dropping tray neatly collects everything ready for you to simply slide out and add to your compost bin. The eglu is perfect for up to four chickens and each one will lay around six eggs a week.

The chickens that Omlet deliver are particularly well-suited to domestic gardens. We only supply female chickens which, unlike cockerels, don't crow. They make excellent pets for children and get on well with most other animals including cats and dogs. If you are thinking of keeping chickens for the first time Omlet has all the experience to help you get started.

The eglu comes with run, shade and feed and water containers

### Winter Shade

The winter shade gives your pet extra shelter during the winter months. It attaches with bungee hooks and covers the top and one side of the run to protect against the elements.

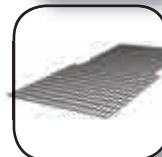

**£20**

### 'Rabbitlopaedia'

*by Meg Brown & Virginia Richardson MA VetMB MRCVS*

A must for every rabbit owner. The detailed but clear information will give you complete confidence in keeping these pets. There are particularly good sections on breeds, lists of safe and unsafe foods and handling. It's also an interesting and enjoyable read and comes highly recommended. **£6.50**

### Underfloor Wiring

This is an attachment to the eglu run which will prevent persistent diggers from digging out. It's simple to attach, just pull out of the box and unfold. It can then be placed under the run. The holes in the mesh have been sized so that they won't interfere with your rabbits movement whilst enabling grass to grow through it.

**£23.99**

### Run Extension

The run converter adds a further 1m length to your run. These extra panels increase the size of the area that your rabbits can explore in safety. It is made of the same strong steel weldmesh coated with the durable PPA coating and has the anti tunnel skirt.

**£47**

### Cuddly Rabbit

Cute and fluffy, how could you resist giving this little bunny a home?

**£9.49**

To order these items please call **0845 450 2056** or you can order and pay securely online at **[www.omlet.co.uk](http://www.omlet.co.uk)**
